An asterisk will be displayed to show that it is a conditional section or conditional question.

Survey: Applicability Questions

10-28-2021 Page 3 of 6

Section: IA FY22 Missouri River Applicability Question			
Question Answer Choices Points			
The land and landowner(s) are located in the Missouri River floodplain	YES		
and are eligible for enrollment in ACEP-WRE in Iowa.	NO		

Survey: Category Questions

Section: IA FY22 Missouri River Category Question				
Question Answer Choices Points				
What wetland type is contained/restorable within the ACEP-WRE application area boundary?	Depressional			
	Riverine			
	Missouri River			
	Fen/Remnant			

Survey: Program Questions

Section: IA FY22 Missouri River Program Questions				
Question	Answer Choices	Points		
	6	20		
From the choices below, select the score from Section IA., "Wildlife	4	12		
Benefits":	2	6		
	0	0		
	6	20		
	5	15		
	4	10		
From the choices below, select the score from Section IC., part 2 of the ranking form, "Applications in CRP":	3	5		
	2	3		
	1	1		
	0	0		
	4	8		
	3	6		
From the choices below, select the score from Section IIA. of the ranking form, "Economic Benefit":	2	4		
	1	2		
	0	0

A. Restoration and management of the application area would be heneficial.to , and located within suitable separation distance of a documented non-wetland dependent INAI Threatened or Endangered species as determined by IDNR biologist.
documented non-wetland dependent INAI Threatened or Endangered species as determined by IDNR biologist. B. Application area is >35 acres and enrollment will result in a contiguous wetland complex greater than 500 acres in size when
documented non-wetland dependent INA1 Threatened or Endangered species as determined by IDNR biologist. B. Application area is >35 acres and enrollment will result in a contiguous wetland complex greater than 500 acres in size when udded to adjacent and similarly protected easements and/or public land.
documented non-wetland dependent INAI Threatened or Endangered species as determined by IDNR biologist. B. Application area is >35 acres and enrollment will result in a contiguous wetland complex greater than 500 acres in size when added to adjacent and similarly protected easements and/or public land.
documented non-wetland dependent INA1 Threatened or Endangered species as determined by IDNR biologist. 8. Application area is >35 acres and enrollment will result in a contiguous wetland complex greater than 500 acres in size when ddded to adjacent and similarly protected easements and/or public land. C. The application area includes a Fen or Hydric Prairie Remnant with an FQI > 20
documented non-wetland dependent INAI Threatened or Endangered species as determined by IDNR biologist. B. Application area is ≥35 acres and enrollment will result in a contiguous wetland complex greater than 500 acres in size when added to adjacent and similarly protected easements and/or public land. C. The application area includes a Fen or Hydric Prairie Remnant with an FQI ≥20 D. The landowner will accept (in writing) a 5% reduction to the determined offer value.
documented non-wetland dependent INAI Threatened or Endangered species as determined by IDNR biologist. B. Application area is >35 acres and enrollment will result in a contiguous wetland complex greater than 500 acres in size when udded to adjacent and similarly protected easements and/or public land. C. The application area includes a Fen or Hydric Prairie Remnant with an FQI ≥20 D. The landowner will accept (in writing) a 5% reduction to the determined offer value. E. The application is for a 30 year easement.
documented non-wetland dependent INAI Threatened or Endangered species as determined by IDNR biologist. B.
